

Vision and Mission

Forensics For Justice is a non-profit organisation that has identified that public administrative bodies, in particular the criminal justice system, has been captured by criminals, or politically corrupt individuals that serve unconstitutional agendas, with the aim to protect 'connected' criminals from corruption charges.

We acknowledge that until this scourge has been dealt with, the South African dream, given to us by the likes of Nelson Mandela and his hero comrades, will never be realised. Some of these people made the supreme sacrifice, NOT so that greedy people could bring our country to its knees whilst the poorest of the poor continued to suffer.

We strive to rid our beautiful country of the corrupt scourge of public officials who have a legal duty and responsibility to advance the interests of the public.

Corruption causes a plethora of social ills, which include the weakening of public and private institutions, the criminalisation of individuals and the undermining of social solidarity, which thereby undermines our Constitutional Democracy.

Through the use of forensic investigative methods we are able to expose corruption and those who act corruptly. By doing so we are able to promote transparency and accountability and inevitably protect the scarce public resources, so that the poorest of the poor may have hope for a better future.

We will also step up and assist those incapable of standing up for themselves, where it is in the public interest to do so, whether the crime against them is corruption or not.

We encourage all citizens to join our cause, as exposing corruption enhances democracy, the rule of law and the establishment of a more caring and just society, that looks after the most-needy in society.

A handwritten signature in black ink, appearing to read "AJB", is positioned above a horizontal line.
